PACKAGING

We offer many packaging options for both the contractor and court owner. Most of our products come in 80 lb. bags with the option of getting that product in an Easy-Lift 50 lb. bag as well. The 50 lb. bag option is intended for those of us not used to handling bags all day. Some insurance company requirements in certain areas will dictate using a 50 lb. bag. Both the 80 lb. and the 50 lb. bags can be palletized and stretch wrapped for easy handling and weather protection. For our contractors, we also stock and load Har-Tru or HydroBlend in bulk bags. These disposable bags are available in 2000 lb., 2500 lb. and 2800 lb. and can be taken right from the truck to the court with a forklift.

HAR-TRU

Tennis court surfacing with binder. For use on Har-Tru courts with sprinkler systems. Available in:

- 1.0 ton pallet with 80 lb. bags
- 1.4 tons per pallet with 80 lb. bags
- 1.0 ton pallet with 50 lb. bags
- 1.4 tons per pallet with 50 lb. bags
- 2000 lb. bulk bag
- 2500 lb. bulk bag
- 2800 lb. bulk bag

HYDROBLEND

Tennis court surfacing material for sub-irrigated tennis courts. Available in:

- 1.0 ton pallet with 80 lb. bags
- 1.4 tons per pallet with 80 lb. bags
- 2000 lb. bulk bag
- 2500 lb. bulk bag
- 2800 lb. bulk bag

AMERICAN RED CLAY

Tennis court surfacing material for use on red sub-irrigated tennis courts or for top dressing a variety of natural clay courts. Available only in:

- 1.4 ton pallet with 70 lb. bags
- 2000 lb. bulk bag

MAGNESIUM/ CALCIUM CHLORIDE

For dust control and moisture retention. The safest option for the environment. Magnesium Chloride is available in 50 lb. bags.

HAND MODEL - #01242HG/N - Variable **TOW MODEL** - #01242TG/N - Variable

HAND MODEL - #01242HG/F - Fixed **TOW MODEL** - #01242TG/F - Fixed

Light reconditioning of a fast dry court demands an even distribution of fast dry material.

Offers a big improvement of the classic fast dry spreader for this purpose. Both models will hold four 80 lb. bags. This spreader offers both adjustable rate distribution control and mechanical

simplicity. Configured with the fixed rate bottom, this fast dry spreader will produce consistent and even layers in proper proportions for top dressing a court. The adjustable bottom is stainless steel and can be used for magnesium chloride or other spreading uses. If cleaned properly to protect the steel, this unit will give years of service. Larger tow models for heavy-duty use are available.

Tru-Flow top-dressers

01250-24D-24" hand spreader

01250-36D-36" tow spreader

01250-54D-54" tow spreader

We are excited to introduce a completely new line of spreaders...Tru-Flow top-dressers. These three top-dressing units offer unmatched performance in distributing Har-Tru as well as sand, rubber, and other materials for synthetic grass, natural turf and running tracks. Tru-Flow spreaders handle the toughest of conditions. For top dressing to be effective, it needs to be applied as uniformly as possible. Just spreading material around no longer produces the desired result. Tru-Flow's unique, 8" dispersal drum, is encased in expanded metal, allowing the Har-Tru inside the spreader's hopper to be placed on the court. Conventional drop spreaders rely on gravity to help release the Har-Tru from its hopper, but the Tru-Flow, pulls the surface out of the hopper and on to the court with unmatched consistency. A 24" hand model will hold up to 4-80 lb bags of Har-Tru and the 36" and 54" tow-type top-dresser can over 15 bags.

Scarifier / Lute 30" - #874

Scarifier / Lute 48" - #874-L

Two tools in one. The lute-scarifier is an all-aluminum combination tool for scarifying, leveling and removing loose granules. It is strong and sturdy, yet light enough to use all day. This tool is also excellent for spreading new material top-dressing. The concave shape of the 30" wide blade allows the tool to "float" along the surface, without grabbing or digging in. This is one of the most versatile tools available for Har-Tru courts. Also available in 48" width.

Tapes

Designer Tape with its sure-spin feature has a unique raised pattern, specifically designed to allow consistent ball spin and speed no matter which angle the ball strikes the tape. It offers easy cleaning, long-life and stability. The webbing is made from the finest synthetics available with a pure PVC coating. The coating is not diluted with fillers, which can cause yellowing with age. It is available with or without pre-formed nail holes. The Designer Marking Tape is the best line tape you can buy for your money.

Classic Tape has the same top quality webbing and vinyl coating used in our Designer Line Tape. It has an even textured, rubberized coating which combines good ball bounce, long-life and easy cleaning. Available with preformed nail holes. The Classic Tape represents affordable quality in a line tape.

Herringbone Tape is designed to assure consistent ball spin and speed regardless of the angle at which the ball strikes the tape. Not only is the Herringbone Marking Tape a great tape for the game, it's a great tape for the court owner and builder. It is easy to install, of long lasting vinyl, meets specifications, cleans easily, stays white longer and has pre-formed holes for nailing ease. It has the same quality of the LEE Classic Tape, but with added texture. The balance of quality construction and player benefits make the Herringbone T the best tape value.

Nails

#878- 8lb. Box and #878-25 - 25lb. Box

2-1/2" aluminum nails (large head), 8 pounds per doubles court. For regular Har-Tru courts. Available in 8 lb. or 25 lb. boxes.

#878-3 - 11lb. Box and #878-11 - 25lb. Box

3" aluminum nails (large head), 11 pounds per doubles court.† Great for sub-surface irrigated courts. Available in 11 lb. or 25 lb. boxes

COURTPAC

#2000CP-24 - 24" CourtPac Roller

#2000CP-48 - 48" CourtPac Roller

Easy to operate and easy to maintain, we believe you will find the CourtPac the best designed, best engineered tennis court roller on the market today. Why? It's easy to start - The unit is equipped with a Honda engine that starts on the first pull almost every time. It's easy to operate - Speed and direction are controlled with a hydrostatic transmission that is smooth and responsive. This transmission comes from the lawn mowing industry where it has shown exceptional durability. It's easy to steer - The seat adjusts to position the driver where they can easily reach the handle bars and set their feet down on the large stable foot tray with traction tread. This means it requires very little strength or energy to maneuver the roller. It's easy to

maintain - Just add oil! There are no chains or sprockets and the heavy duty polyurethane scraper bars will last years before replacement is needed. It's safe - There is an emergency stop button, emergency break and a safety switch under the seat. Neutral safety switches prevent the roller from starting or jumping when in gear. It's the little things - The engine has been positioned on the roller to blow all exhaust fumes away from the driver. The scraper bars are polyurethane for quiet operation. The seat is large, cushioned and light to keep it from heating up in the hot sun. We've even included a cup holder!

COURTPAC PRO

ROLCPP04 - 48" CourtPac Pro Roller

ROLCPP05 - 60" CourtPac Pro Roller

While the CourtPac Pro may look a bit similar to its predecessor, the 4' and 5' Proline Roller, that is where the similarities end. The Pro is powered by an ultra-reliable, 5.5HP Honda engine and driven by a fan-cooled HydroGear hydraulic transmission. This is the same transmission used in our recently redesigned CourtPac solid drum construction roller, as well as tens of thousands of industrial lawn mowers throughout North America. The redesign also incorporates improved comfort features for the driver. CourtPac Pro users will benefit from a fully adjustable, cushioned, high-back seat and newly

designed foot deck. The new seat offers comfort and improved sightlines, and when coupled with the new, skid-resistant foot deck design, makes the unit, by far, the safest and most easily maneuverable unit available on the market today.

and allows the user to see the roller as you are moving to determine if the court is too wet to roll by seeing the amount of material that is sticking to the roller. The Pro's unique rolling system uses a series of 14" wide cylindrical roll sections, allowing each section to turn independently as the driver makes turns on the Har-Tru court. This system eliminates the tearing or "biting" that some solid section rollers created when making similar turns. Much like the Proline roller of yesterday, the CourtPac Pro has two, fully-adjustable grooming brushes for leveling and smoothing your Har-Tru court and a scraper brush to keep the roll sections clean of granular build-up.

Tow Roller

#184AR 4' Roller #185AR 5' Roller

The Tow Roller is an easy to use alternative to the power roller. It can be pulled by a golf cart, lawn tractor or utility vehicle and still offer the same rolling speed and convenience as the power roller. This unit can be upgraded to a motorized roller at any time by attaching the 184EP power head. It comes with a weight tray, towing tongue, scraper brush, and front and rear court brushes. The standard models are 4' and 5' with other widths available on special order. 1 year warranty.

Split-Roll Hand-Tow Roller

#2400HR24

This 24" x 24" improved hand roller gives the same split roller action as one of our more expensive rollers. The dual drums can be water filled for added weight, yet it can turn on the court without tearing the court surface. This is the only hand roller that can be towed in ovals with its dual-purpose handle. A scraper brush is included for removing any buildup on the drum. It is an especially good roller for the private court owner who is on a tight budget. 1 year warranty.

Small Hand Roller

#1824H-18

Perfect for the club that needs touch-up work around court edges, patching low spots, etc. The drum size is 18" x 24" and can be filled with water for a total weight of 320lbs. The unit is all steel and comes with a scraper bar for removing any

build-up on the drum. This roller is a good companion for your heavy duty court roller. 1 year warranty.

Roller Brushes

#184B 4'#185B 5'

The complete brush assembly includes the brush, upright mounting rods, floating springs, adjustment knobs and The brushes have easy to change, replaceable bristles.

Tow Scarifier #187-4 4' Model

This heavy-duty tow model scarifier is truly a workhorse for loosening the top surface on HAR-TRU courts. It is especially good for indoor with excess calcium build-up. The unit is heavy enough to allow its two rows of case hardened nails to really penetrate the surface. Staggered nails on each row prevent clumps sized to fit between the alley tapes. Levered wheels lift unit over the tapes so tapes can be left in place. Angled nails self sharpen as

they are used adjustable steel rails lower nails as they wear down. Removable steel plate allows for easy nail replacement

are used adjustable steel rails lower nails as they wear down. Removable steel plate allows for easy nail replacement

Court Devil Jr.

Court Devil Jr. #187CD-Jr.

This smaller hand model Court Devil is designed for maintaining areas along court perimeters and beneath the net line. It is also great for loosening localized hard spots, Weight 85lbs., Width 16", Length 24", Height 10".

Court Devil

Court Devil #187CD

The tow model Court Devil is designed to agitate the court surface without removing algae, and fungus that may tighten the court surface. or damaging existing line tapes.

It helps prevent and break-up mineral deposits, mold, algae, and fungus that may tighten the court surface. The court is scarified with circular steel blades mounted on free turning axles. Weight 105lbs., Width 4', Depth 12".

Court Rake #05CT-RAKE

The Tow Model Court Rake is designed to loosen and groom the court surface with 1/4" wide teeth. When used on a regular basis, the court rake will keep the court surface smooth and growth problems to a minimum. The Court Rake can be safely pulled over the line tapes and has a built-in fence and net guard. The Court Rake is 73" long and weighs 35 lbs. A hand model is also available.

#05CT-TEETH/SET

Replacement Teeth for the Court Rake now come in easy-to-install, twelve inch sections. Six sections are needed to replace the entire set. The Replacement Teeth will fit old style rakes.

Drag brush

#117H Handle Model

#117T Tow Model

As the standard of the industry, this drag brush has the built-in strength and versatility you would expect from a LEE product. It has replaceable dual 4-1/2" bristles designed to level and manicure your court. As it wears, you can reverse the handle and double the life of the broom. Other bristle combinations available on special orders.

Steel-Bristle Drag Brush

#117H-STEEL

#117T-STEEL

Thanks to the efforts of product development manager Roy Hey Lee Tennis has developed a stainless steel bristle for this increasingly popular product. The steel bristles excel at agitating the surface of hardened indoor courts and outdoor courts with sub-surface irrigation. They also help break up algae and prevent its formation. The transition to stainless steel bristles will reduce increase this products durability. This bristles come in 12" section and can be purchased to replace bristles on existing brushes.

Drag Brush / Lute

#117LH HANDLE MODEL

#117LT TOW MODEL

The Drag Brush/Lute combination has three individual rows of 6" bristles. Two softer outer bristles move the finest particles of HAR-TRU, and a third firm inner bristle levels low spots and divots in the court. Turn the brush over and you

have a 7" Lute perfect for cutting out high spots or leveling small patches. Every club should have one of these "top of the line" Drag Brush/Lutes.

Aussie Clean Sweep

#118H

This unique combination tool came all the way from Australia to help pick up and remove those troublesome leaves, pine needles, stones and other debris found on your court. The PVC tines literally lift the debris and flip it on top the unit so it can be carried off the court.† It even picks up the ball fuzz left on the court and at the same time grooms the court surface like a drag brush.

This dual-purpose tool will save you hours of tedious clean up of your court.† Available in 4' and 8' widths.

#DBL-BW 6" Stiff Bristle

Tow Handle

#117TT (tow handle only)

The Tow Handle sets the Drag brush at the proper angle and provides for easy attachment to a utility vehicle for those who do not wish to brush by hand. Special knuckle action helps prevent breakage if the brush bumps the fence or net while in tow.

Deluxe Proline Line Sweeper #120

The Deluxe Proline Sweeper can add that finishing touch to your HAR-TRU court. It cleans lines as quickly as you walk. This line sweeper is designed with friction-driven rubber sleeves, a rugged synthetic bristle brush available in coarse or fine, and a fence hook for easy storage. The Proline is made of cast aluminum construction and is rust resistant. An easy-to-grip, curved handle gives extra leverage to aid sweeping action. This deluxe sweeper makes cleaning lines quick, easy, and efficient.

Line Scrub #124

This product is quite basic but fills a definite need, especially in the Florida area where tapes stay down for several seasons. Heavy bristles give the brush enough body to break up the HAR-TRU that gets caked on the tape. The unique aluminum handle gives the needed leverage to make the job easy. The bristles stay replaceable for added value and long life

Line Master #123

Our LEE Line Master features a curved handle, all-aluminum construction for rust-free outdoor use, positive locking brush action, and a perfectly textured brush for an easy-to-use yet firm brushing action. The angle allows the brush to dig in and remove those hard to clean areas that require more pressure. The LEE Line Master is the best buy for your money. Brushes available with coarse or fine bristles.

Replacement Brush Assemblies

#120B-A (Brush, Springs, Axle, s)

#120B(Brush only)

#123B-A (Brush, Springs, Axle,)

#123B(Brush only)

Complete replacement brush assembly includes synthetic brush, axle with nylon sleeves, and springs. It is easy to install and requires no special tools.

Scrusher Deluxe - #886

The Tennis shoe cleaner. Three (3) sets of brushes on the bottom with its steel frame and hard maple replacement brushes, is designed and built to last. Side brushes are made of softer poly, won't scratch shoes. Bottom bristles are made of stiff nylon throughly clean soles of footwear. Elevated base for easier cleaning

SCRUSHER Tennis Base - #886-T

The Tennis shoe cleaner. Cleans bottom and sides of shoes
Metal Base - Tennis

Tennie Two-Step Brush - #885-A

The perfect addition to your Tennie Two-Step. This brush attachment will allow to "Brush" away any excess surface lodged in your tennis shoes. The aluminum frame and replaceable, long-lasting polyethylene bristles will give you years of trouble-free use.

Tennie Two Step - #885

With the Tennie Two-Step there is a way to keep carpets, shoes, and pathways cleaner. Tennie Two-Step is simplicity itself. It is a polyethylene basin containing two perforated rubber panels. As players rock back and forth, jets of water are forced through perforations, flushing deeply embedded Fast-Dry from the soles of players' shoes. The Tennie Two-Step's simple, effective design and durable construction ensure that it will remain a long-lasting, dependable means of keeping paths and carpets cleaner. It is made of UV resistant polyethylene

The Treadblaster - #885-TT

This unique shoe cleaner has high force, concentrating nozzles that shoot crossing jets of water into the soles of your shoes, thoroughly cleaning out all Har-Tru in just 5 to 10 seconds. The Treadblaster typically uses one quart of water per cleaning and has side towers that prevent any significant over-spray that could wet shoes, clothing or legs. It doesn't require any electricity but does need a standard 3/4" garden hose with pressure of 30 to 60 PSI (pressure-reducer valves are available for higher pressures). The unit can be attached to any solid, level surface using the included mounting plate.
